Ivanka Chaental Louise Mendoza

AI & Automation Engineer · Metro Manila, Philippines

mendozaivanka@gmail.com mendozaivanka.github.io github.com/mendozaivanka
linkedin.com/in/mendozaivanka

Senior AI and Prompt Engineer with expertise in designing, developing, and optimizing enterprise AI solutions, multi-agent workflows, and RAG architectures. Skilled in utilizing platforms such as Amazon SageMaker, Amazon Bedrock, OpenAI, and Anthropic to support the quality assurance of enterprise AI tools. Proficient in Python and LlamaIndex, with a strong track record of leading prompt optimization strategies, implementing responsible AI frameworks, and delivering actionable, data-driven insights to executive stakeholders. Proven ability to translate complex requirements into scalable, maintainable solutions that improve efficiency and reduce manual work.

3.2×	75%	~90%	~93%
more real issues caught	less manual workload	retrieval accuracy	F1 score

EXPERIENCE

Senior AI / Automation / Prompt Engineer

Jun 2026 – Present

Genpact Services LLC · Quezon City, Metro Manila

- Design, develop and optimise AI/LLM solutions, workflows and multi-agent systems supporting quality assurance of enterprise AI tools for banking and capital markets.
- Architect enterprise AI solutions with LangChain, LlamaIndex and Hugging Face, including retrieval-augmented generation and model evaluation methods.
- Lead prompt engineering and optimisation across OpenAI, Anthropic, Azure OpenAI, Amazon SageMaker and Amazon Bedrock, for outputs that are accurate, safe and consistent.
- Partner with product, engineering and cross-functional teams to find high-impact AI opportunities and set up AI governance and responsible-AI frameworks.
- Mentor team members and run knowledge-sharing on AI implementation practice.
- Analyse datasets and test results into reporting and actionable insight for executive stakeholders.

Assistant Research and Development Engineer

Jul 2024 – May 2026

Advanced World Systems, Inc. · Alabang, Muntinlupa

- Designed and implemented automated anomaly detection and dashboard reporting in Tableau, improving real-issue detection 3.2× and reducing manual workload by 75%.
- Built RAG pipelines on LlamaIndex that recommend relevant test cases with ~90% retrieval accuracy, automating test-plan creation over structured and semi-structured data.
- Fine-tuned local LLMs with Unsloth and Ollama for automated root-cause analysis, reaching ~93% F1 through iterative prompt engineering.
- Built Selenium-based ingestion pipelines that collect and transform data into structured PostgreSQL databases.
- Integrated AI models into a Django web application for real-time inference and automated end-user workflows.
- Worked closely with internal and client stakeholders to turn complex system requirements into structured, maintainable solutions.

Intern

Jan 2024 – May 2024

Advanced World Systems, Inc. · Alabang, Muntinlupa

- ✦ Developed automated performance-monitoring tools for GPU and NPU utilisation in C#/.NET.
- ✦ Automated AI environment setup and inference workflows with Python and OpenVINO.
- ✦ Researched local LLM inference and NPU optimisation to support internal decisions.

CASE STUDIES · MENDOZAIVANKA.GITHUB.IO/PROJECTS

Anomaly Detection & Reporting · From a manual review queue to alerts people trust: 3.2× more real issues caught with 75% less monitoring.

Test-Case Recommender · A retrieval pipeline that drafts the test plan: ~90% retrieval accuracy over the team's test library.

Root-Cause Analysis Model · A fine-tuned local model that reads failures and proposes a root cause: ~93% F1, and the data stays on-prem.

EDUCATION

B.S. Information Technology, Summa Cum Laude · GWA 1.24

Saint Louis University · Baguio, Benguet · 2020–2024

CERTIFICATIONS

Fundamentals of Deep Learning · NVIDIA
Foundations of Data Science · Google
PhilNITS FE Level 2 · ITPEC
JLPT N4 · Japanese Language Proficiency Test

SKILLS

Programming	Python, JavaScript, C#
Data & analytics	Tableau, PostgreSQL, Elasticsearch, Logstash, Excel
AI / ML tools	Hugging Face, LlamaIndex, Ollama, Unsloth, OpenVINO
Frameworks	Django, Flask, Vue.js, Selenium

LANGUAGES

English (Fluent) · Filipino (Native) · Japanese (JLPT N4 · 日本語)
